The journal includes celestial mechanics in its broadest sense; i.e. the mathematical, physical and computational aspects of space mechanics; astrodynamics; rigid and non-rigid body dynamics; particle dynamics; geodesy, not only with respect to the earth but as applied to all other planetary and celestial bodies; and those aspects of ionosphere physics, atmospheric physics, electronic and visual observation theory, statistics, nonlinear mechanics, and numerical analysis, in so far as these bear directly on celestial and space mechanics problems.

Subscription price per volume of four issues Dfl. 160,- / US $64.00, plus Dfl. 12,50 / US $5.00 for postage and handling. Two volumes are published yearly. Personal subscription price on request.
